

A TECHNIQUE FOR PROVIDING CONTINUOUS
SPEECH RECOGNITION AS AN ALTERNATE INPUT DEVICE
TO LIMITED PROCESSING POWER DEVICES

ABSTRACT

5 A technique for data entry at a device is provided. Initially, voice data is received at the device. The voice data and a device identifier are transmitted to a computer. At the computer, the voice data is translated to text. Next, it is determined whether to filter the translated text. When it is determined that the translated text is to be filtered, a filter is applied to the translated text.
